insulating glass (IG Units)

Oldcastle BuildingEnvelope™

Engineering your creativity™

Our IG units are sealed combinations of two or more lites of glass separated by a dry airspace. IG units improve the thermal performance of windows, thus significantly reducing heating and air-conditioning costs. IG units also reduce interior condensation in cold climates, and increase comfort near windows, thus maximizing the usable interior space.

Insulating Glass Applications

Insulating glass (IG) units are used in a wide range of applications including:

- Commercial/Residential Fixed and Operable windows
- Curtain Walls
- Storefronts
- Sloped/Overhead Glazing
- Non-vision (Spandrel) Locations
